EVOLUTION
2003 vs. 2016

- PCs, laptops, tablets, smart phones
- Light and user-friendly portable apps
  - Responsive web design
- Advanced search options
- Interconnectivity
- User-friendly and improved look & feel
- Fast editing (predictive typing)

NEEDS
Making life easier for users

- Follow users' needs and wishes
- Add new features for terminologists
- Make the application transparent for translators and accessible to more users
- Have new data available in real time

EXPECTATIONS
Improve...

Technologies...
- create new needs
  help meeting users' needs
- make applications out of date
  help attracting and retaining users

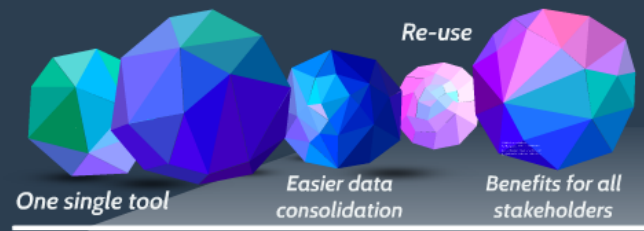
Meet modern standards to attract more users, improve usability, care about accessibility and quality, increase the ROI and build on cooperations!

FEATURES
A well-known name for an improved and brand new tool

- Better look and feel, easier and lighter interface
- Login made easier (automatic authentification integration)
- Quicker indexation of data (i.e. availability)
- Enhanced collaboration and interoperability (APIs, webservices)
- From e-mail to fora for centralised information exchange and information pushed to users
- Accessibility aspects taken into account
- Responsive design

RETURN ON INVESTMENT

Easier feeding & maintenance



External collaborations

Conferences
- for a sharing of resources, practices and expertise

External feedback
- from external users
- via e-mail
- analysis, dispatch and processing

International organisations
- through JIAMCATT (International Annual Meeting on Computer-Assisted Translation and Terminology) which intends to enhance exchanges among languages services of international organizations and national bodies in order to promote the pooling of the partners' terminology resources to make them accessible to all in electronic form.
- some collaborative work (e.g. COP21)

Universities
- Cooperation proposals
- Collaborative work
- Traineeships

From IATE to IATE 2

or when technologies are agents of change and means to improve users' satisfaction

From IATE to IATE 2

  help attracting and retaining users

Meet modern standards to attract more users, improve usability, care about accessibility and quality, increase the ROI and build on cooperations!

FEATURES

A well-known name for an improved and brand new tool

- Better look and feel, easier and lighter interface
- Login made easier (automatic authentification integration)
- Quicker indexation of data (i.e. availability)
- Enhanced collaboration and interoperability (APIs, webservices)
- From e-mail to fora for centralised information exchange and information pushed to users
- Accessibility aspects taken into account
- Responsive design

- Simplified use of the tool:
  - Contextual help (with extracts from IATE Handbook)
  - Search options adapted to profile
  - User statistics and central statistics
  - More transparent way to feed IATE
  - Quicker data feeding and modification
  - Clearer display of non-validated data and more prominent display of "last modification date"
  - Wider search possibilities via full-text search
  - Early duplicate detection mechanism and enhanced data validation
  - Terminology project coordination module
  - Watch entries mechanisms and quick reporting of problematic content

Release note

Technologies taken on board for IATE 2

New front-end and back-end technologies selected so as to allow IATE 2 to be built based on a microservices architecture:

Back-end: Java 7, REST, JMS, SQL

Front-end: AngularJS (for a more reactive and responsive application)

Data Storage: Oracle Database

Search feature: ElasticSearch

Application Server: Weblogic

Outdated for this project

Back end: JAVA Struts framework v1.x, MVC framework currently fully outdated.

Front end: Servlets / JSP / JSTL / Struts taglibs/ mixed with HTML and CSS
Sometimes all in one page. A complete outdated way to build pages. Too heavy to maintain.

Searching: Oracle Text

A DEDICATED TOOL, EurTerm

- Collaborative platform
- Networked and multi-user
- Knowledge sharing
- Assets sharing
- Collaboration on projects
- Information tool

- Language wikis
- Contact lists (EU terminologists and other experts)
- Collection of (EU and non-EU) assets
- (Eu and international) Terminology events calendar

COLLABORATION BETWEEN LINGUISTS

Translators

- Feed equivalents into the database on the fly

language terminologists

- Validate inserted data by translators in their respective institutions (native language)
- Terminology work assigned by central terminology services
- Update data fields

and central terminologists

- Terminology work coordination (all EU languages)
- Identification and consolidation of existing duplicates (entry level)

COLLABORATION WITHIN IATE

- Thread per entry, language and term
- Queries to relevant language terminologists
- Consolidation tasks assigned directly in IATE (no e-mails, no attachments)
- Direct communication in IATE 2 (no e-mails)

IATE MANAGEMENT GROUP & TASK FORCES

IMG

Various Task Forces, several annual meetings, communication through EurTerm, terminology meetings

Data Clean-Up Task Force

Various strategies, approaches to a semi-automatic clean-up, integration of IATE data in CAT tools, better quality assurance

IATE Handbook Task Force

Revision and update of the IATE Handbook, sharing of best practices

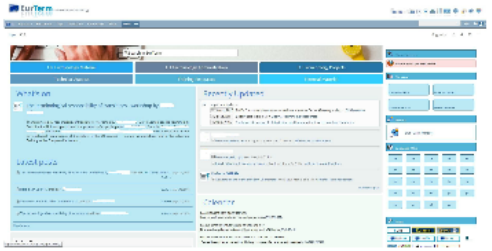
Basics are kept but IATE is about to enter a new era

COLLABORATION WITHIN IATE

- Thread per entry, language and term
- Queries to relevant language terminologists
- Consolidation tasks assigned directly in IATE (no e-mails, no attachments)
- Direct communication in IATE 2 (no e-mails)

A DEDICATED TOOL, EurTerm

- Collaborative platform
- Networked and multi-user
- Knowledge sharing
- Assets sharing
- Collaboration on projects
- Information tool



- Language wikis
- Contact lists (EU terminologists and other experts)
- Collection of (EU and non-EU) assets
- (Eu and international) Terminology events calendar

88
Competent authorities should request auditors to share information on any issues which are relevant to the supervision of the credit institution.
AT
Las autoridades competentes pedirán a los auditores que intercambien información sobre cualquier cuestión que sea pertinente para la supervisión de la entidad de crédito.
89
The information requested may include information related to the audit procedures performed, relevant audit evidence obtained and auditors' conclusions, whenever, in the competent authority's judgement, such information may facilitate the exercise of supervisory tasks.
AT
En la información solicitada podrá incluirse información relativa a los procedimientos de auditoría realizados, las pruebas de auditoría obtenidas pertinentes y las conclusiones de los auditores, siempre que, a juicio de la autoridad competente, dicha información pueda facilitar el ejercicio de las funciones de supervisión.
90
Relevant information is information and knowledge obtained in the statutory audit and related, but not limited, to the following areas, which are described in further detail in the Annex to these guidelines with a non-exhaustive list of issues under each of them:
AT
Se entiende como información pertinente la información y los conocimientos obtenidos en la auditoría legal y otros procesos relacionados, aunque sin limitarse a ellos, con los ámbitos siguientes, que se describen con más detalle en el anexo a estas directrices junto a una lista no exhaustiva de cuestiones supeditadas a cada uno de ellos:
91
External environment and risk profile of the credit institution
AT
Entorno exterior y perfil de riesgo de la entidad de crédito
92
Corporate governance and internal controls
91%
Gobernanza institucional y controles internos
93
Ability of the credit institution to continue as a going concern
AT
Capacidad de la institución de crédito para dar continuidad a sus actividades empresariales
94
Audit approach
100%
Enfoque de la auditoría
95
Financial statements, valuation of assets and liabilities and disclosures
AT
Estados financieros, valoración de activos y pasivos y divulgación
96
Audit report and auditors' communication with the credit institution's management body, senior management or audit committee, or a body performing equivalent functions within the credit institution, on significant matters related to financial reporting and control functions
AT
Informe de auditoría y comunicación de los auditores con el órgano directivo de la entidad de crédito, la dirección o el comité de auditoría, o bien con un organismo que desempeñe funciones equivalentes dentro de la entidad de crédito a propósito de cuestiones importantes relacionadas con la presentación de informes financieros y las funciones de control
97
The main findings of the audit procedures carried out and conclusions.
AT
Principales conclusiones de los procedimientos de auditoría ejecutados y conclusiones.
Where in-depth communication is applied, competent authorities should discuss with auditors, at least, the audit
AT
En los casos en que se entable una comunicación exhaustiva, las autoridades competentes debatirán con los auditores, como

Audit approach

Financial statements, valuation of assets and liabilities and disclosures

Audit report and auditors' communication with the credit institution's management body, senior management or audit committee, or a body performing equivalent functions within the credit institution, on significant matters related to financial reporting and control functions

The main findings of the audit procedures carried out and conclusions

IATE Extract and web services for public users

Systematic re-use of content through an enhanced integration of IATE data into the CAT environment

Data interactively accessible by translators in their working environment

Entries shared between terminologists, in-house translators and external translators

External collaborations

Conferences

- for a sharing of resources, practices and expertise

External feedback

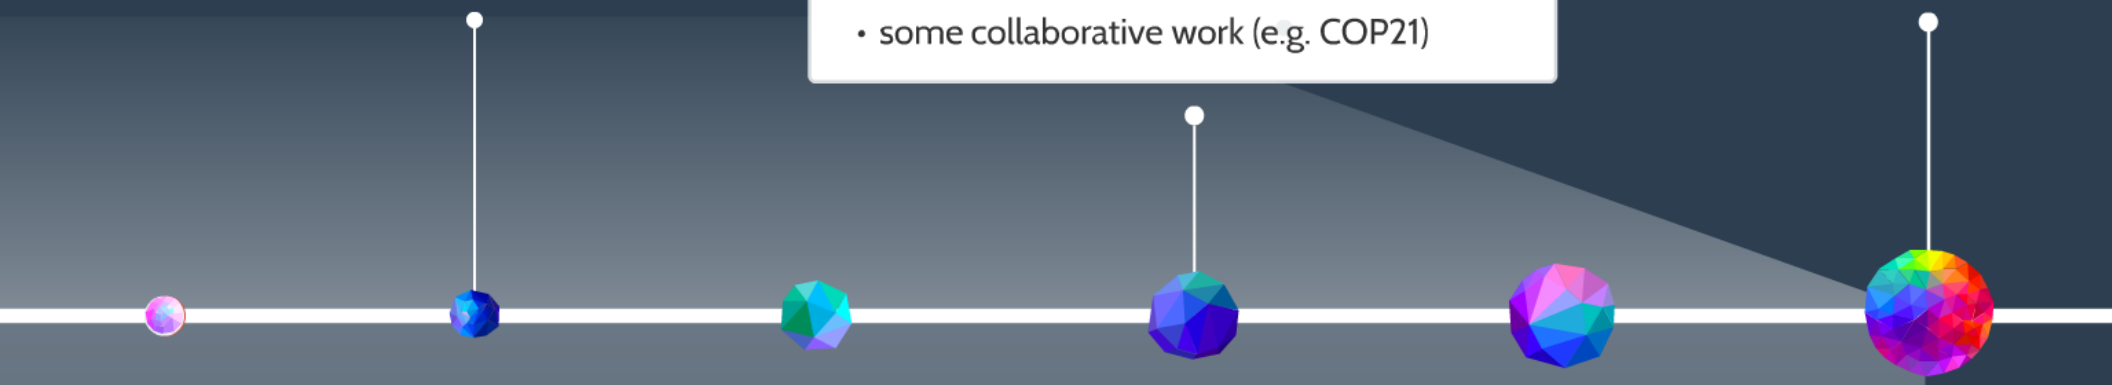
- from external users
- via e-mail
- analysis, dispatch and processing

International organisations

- through JIAMCATT (International Annual Meeting on Computer-Assisted Translation and Terminology) which intends to enhance exchanges among languages services of international organizations and national bodies in order to promote the pooling of the partners' terminology resources to make them accessible to all in electronic form,
- some collaborative work (e.g. COP21)

Universities

- Cooperation proposals
- Collaborative work
- Traineeships



Conferences

- for a sharing of resources, practices and expertise

External feedback

- from external users
- via e-mail

EVOLUTION
2003 vs. 2016

- PCs, laptops, tablets, smart phones
- Light and user-friendly portable apps
  - Responsive web design
- Advanced search options
- Interconnectivity
- User-friendly and improved look & feel
- Fast editing (predictive typing)

NEEDS
Making life easier for users

- Follow users' needs and wishes
- Add new features for terminologists
- Make the application transparent for translators and accessible to more users
- Have new data available in real time

EXPECTATIONS
Improve...

Technologies...
- create new needs
  help meeting users' needs
- make applications out of date
  help attracting and retaining users

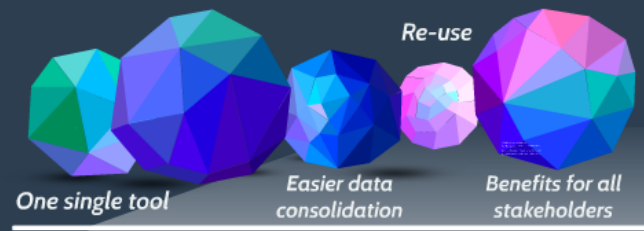
Meet modern standards to attract more users, improve usability, care about accessibility and quality, increase the ROI and build on cooperations!

FEATURES
A well-known name for an improved and brand new tool

- Better look and feel, easier and lighter interface
- Login made easier (automatic authentification integration)
- Quicker indexation of data (i.e. availability)
- Enhanced collaboration and interoperability (APIs, webservices)
- From e-mail to fora for centralised information exchange and information pushed to users
- Accessibility aspects taken into account
- Responsive design

RETURN ON INVESTMENT

Easier feeding & maintenance



External collaborations

Conferences
- for a sharing of resources, practices and expertise
